

Average fuel mix comparison – Wolverine’s regional average for Spartan versus ECAR’s regional average for the 12-month period ending December 31, 2025.

Percent of Fuel Type Used to Produce Spartan’s Total Electricity

Coal	16.75%
Oil	0.32%
Gas	23.29%
Hydro	0.43%
Nuclear	15.70%
Renewable	43.51%
Total Net Generation and Purchased Power	
100.00%	

Percent of Fuel Type Used to Produce Electricity in Michigan, Illinois, Indiana, Ohio and Wisconsin

Coal	25.85%
Oil	0.49%
Gas	35.95%
Hydro	0.66%
Nuclear	24.24%
Renewable	12.81%
Total Net Generation and Purchased Power	
100.00%	

Airborne emissions and high-level nuclear waste comparison – Wolverine’s regional average for Spartan versus ECAR’s regional average for the 12-month period ending December 31, 2025.

Type of Emission/ Waste	Spartan's Average (Pounds/MWh)	Regional Average of All Generation in Michigan, Illinois, Indiana, Ohio and Wisconsin (Pounds/MWh)
Sulfur Dioxide	0.36	0.56
Carbon Dioxide	609.6	940.9
Oxides of Nitrogen	0.38	0.58
High-Level Nuclear Waste	0.0039	0.0060
